

**VANDERBEKEN AMERICAS
S.A. DE C.V.**

Vanderbeken Americas is a Mexican Company, which its core business is the distribution of waste water treatment equipment for municipal and industrial applications, as well install them, start up, service and maintenance for more than 15 years.

HEADWORKS

- Manual Screens
- Fine, Medium and Coarse automatic screens
- Grit Removal Equipment (Vortex, Detritus, Traveling Bridge Channel etc.)
- Sand Classifiers
- Fat, Oil and Grease Removal

AERATION

Aeration Systems with fine, ultrafine and coarse bubble diffusers with EPDM membranes, EPDM membranes with PTFE, other materials depending of the characteristics of the water you want to treat. As well as other Aeration Technologies.

- Disk Diffusers 9" & 12"
- Tube Diffusers several lengths and diameter
- Panel Type Diffusers
- Air Blowers
- Venturi Aeration
- Submersible Aeration by means of Mixers and Jet Mixers

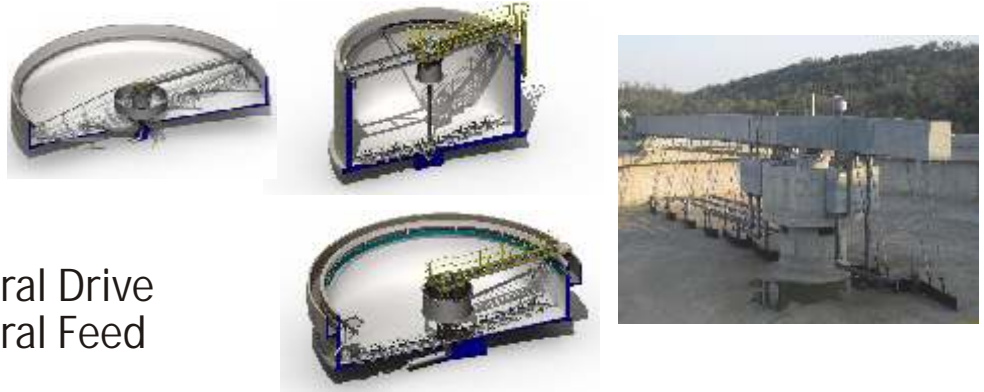

CLARIFIERS

Clarification of industrial and municipal waste water, with primary and secondary clarifiers as well as thickeners and clariflocculator.

Type

- Spiral
- Tow-Bro
- Scrape
- Suction
- Central and Peripheral Drive
- Central and Peripheral Feed
- Lamella Plate

SLUDGE

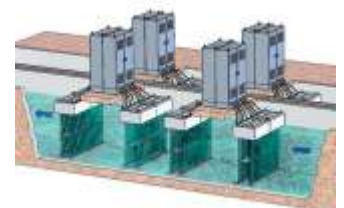

Sludge Dewatering Equipment with the best technologies, to thicken, dewater and dry sludge form municipal and industrial waste water treatment plants.

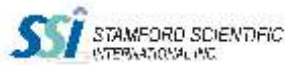

- Filter Bag
- Filter Belt
- Centrifuges / Decanters
- Filter Plates
- Rotary Press

OTHER EQUIPMENT

- UV disinfection
- Filtration Systems, Tertiary Filtration
- Pumps, Submersible, Progressive Cavity, Centrifugal Vertical and Horizontal
- Valves Butterfly, Check and Air Release Valves

NOVA ROTORS s.r.l.
